

SAURABH ZAMBARE

Software Developer | Junior Data Scientist | Full-Stack Web Developer | Python, Django, React, PostgreSQL
Vadodara, Gujarat, India | zambaresaurabh10@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Early-career software developer with Computer Programming and Computer Science & Engineering education and hands-on project experience in full-stack web development, data analytics, and machine learning. Built software with Python, Django REST Framework, React, TypeScript, PostgreSQL configuration, REST APIs, JWT, Docker, testing, CI workflows, and structured documentation. Brings nearly five years of Canadian operations experience with progressive leadership responsibilities, including team coordination, training, reporting, process improvement, and accountability.

TECHNICAL SKILLS

Programming: Python, TypeScript, C#, Scala

Web Development: Django, Django REST Framework, React, React Router, Vite, Tailwind CSS, REST APIs, JWT authentication

Databases: PostgreSQL, SQLite, relational data modeling

Testing & DevOps: Git, GitHub, GitHub Actions, Docker, Docker Compose, Vitest, React Testing Library, xUnit, pytest, ESLint, Prettier

Data & Machine Learning: Pandas, NumPy, scikit-learn, XGBoost, Apache Spark, Spark SQL, Tableau, Matplotlib, Plotly

FEATURED SOFTWARE PROJECTS

Discipline System - Full-Stack Gamified Productivity Web App | [GitHub](#)

Python | Django | Django REST Framework | React | Vite | Tailwind CSS | PostgreSQL | JWT | Docker | GitHub Actions

- Built a full-stack productivity application that turns habits and disciplined actions into quests, EXP, levels, streaks, achievements, and social progression.
- Designed relational models and REST API workflows for users, player profiles, quests, and progression, with JWT-based authentication and server-owned business logic.
- Integrated the React/Vite frontend with Django REST APIs, used Docker/Docker Compose for local environments, and ran automated frontend/backend checks in GitHub Actions.

EPC Project & Vendor Management System | [GitHub](#)

C# | .NET 8 | LINQ | async/await | xUnit

- Implemented C#/.NET foundations for vendor, employee, and project management, including domain models, LINQ operations, asynchronous programming, and in-memory workflow exercises.
- Wrote xUnit tests for implemented vendor behavior and documented planned MVC application architecture, relational data design, business workflows, and engineering decisions.

SUPPORTING DATA, MACHINE LEARNING & ANALYTICS PROJECTS

Mercedes-Benz Greener Manufacturing | [GitHub](#)

Python | Pandas | NumPy | Matplotlib | scikit-learn | XGBoost | Jupyter Notebook

- Performed exploratory analysis and categorical encoding on manufacturing data, then investigated tree-based feature importance using XGBoost and Random Forest techniques.

Real Estate & Mortgage Analytics | [GitHub](#)

Python | Pandas | scikit-learn | Tableau | Plotly | Jupyter Notebook | pytest

- Analyzed real-estate and mortgage data and modernized the modeling workflow with pipeline-based preprocessing, training-only cross-validation, model comparison, holdout evaluation, and diagnostic analysis.

Market Analysis in Banking Domain | [GitHub](#)

Scala | Apache Spark | Spark DataFrames | Spark SQL | Spark ML StringIndexer

- Used Spark DataFrames, SQL, aggregation, and feature engineering to analyze banking campaign outcomes and demographic/account-balance patterns, including categorical transformations with StringIndexer.

PROFESSIONAL EXPERIENCE

McDonald's Canada - Department Manager

Sault Ste. Marie, Ontario, Canada | 2021 - May 2026

- Progressed from Crew Member into management responsibilities in a high-volume restaurant environment.
- Coordinated team workflows and staffing priorities during daily operations and communicated priorities across the team.
- Trained and coached team members on operational standards, procedures, safety, and service expectations.
- Reviewed operational reports and monitored inventory and waste to support process control, consistency, and cost awareness.
- Resolved day-to-day operational issues while strengthening communication, prioritization, accountability, and problem-solving.

EDUCATION

Sault College

Ontario College Diploma - Computer Programming | Sep 2021 - Jun 2023

Sault Ste. Marie, Ontario, Canada

ITM Vocational University

Integrated B.Tech - Computer Science & Engineering | 2017 - 2020

Vadodara, Gujarat, India | Completed June 2020

SELECTED PROFESSIONAL LEARNING

Simplilearn: Data Science with Python (Sep 2020) | Machine Learning Advanced Certification Training (Oct 2020) | Tableau Desktop 10 (Nov 2020) | Big Data Hadoop and Spark Developer (Nov 2020)

LANGUAGES

English | Hindi | Gujarati | Marathi | French (B1)
